**US 24 & Judge Orr Road
Intersection Improvements**

The Colorado Department of Transportation invites community members and business owners to learn more about the selected roundabout design of the US Highway 24 and Judge Orr Road Intersection Improvements Project. An open house will be held on May 12 at Patriot High School. Attendees may drop in at their convenience any time between 4 to 6 p.m. to view exhibits and talk with CDOT project team members. Exhibits will be available on the project webpage (see reverse) beginning May 12 for those who would prefer to engage online.

The project focuses on improving access, safety and mobility for motorists. With increasing traffic volumes creating traffic flow concerns, the improvements emphasize improved traffic flow, slower traffic speeds, enhanced safety, accessibility and sustainability, while supporting the future goals of El Paso County.

Following a technical evaluation of improvement options, CDOT determined a roundabout at US 24 and Judge Orr Road will best improve safety and traffic flow. The existing northern connection of Blue Gill Drive to US 24 will be eliminated and a cul-de-sac added. Business and residential access to and from Blue Gill Drive will be maintained. A new roadway connection between Blue Gill Drive and US 24 will be constructed through El Paso County property approximately one-half mile to the southwest of the existing intersection. The US 24 intersection with the new road will be unsignalized and will be a continuous T intersection, allowing southbound US 24 traffic to free flow.
